Summary

Full-stack web developer specializing in Spring Boot (Java) and React (TypeScript), with experience building and deploying scalable, production-ready applications.

Skilled in Linux-based deployments, containerization, Nginx, and Cloudflare, with a strong foundation across multiple programming languages and system design.

Currently focused on developing AI-driven systems, including LLM-based applications and autonomous agents, with a strong interest in backend architecture and scalable technologies.

Experience

- DIR-ACE Technology

Full Stack Software Developer

Developed and maintained full-stack web applications using Spring Boot and modern frontend frameworks, contributing across the SDLC with API design, database optimization, and system improvements.

<https://www.diracetechology.com/>
- Myanmar, MICT Park Main Building

1 year
- Self-employed

Freelance Full-Stack Developer

Built and deployed end-to-end web applications using Spring Boot and React (TypeScript), managing client requirements, Linux-based deployments, and multiple projects independently.

Projects

- Go Pattaya

A full-stack web application designed to help tourists explore attractions, discover local services, and plan their trips in Pattaya, Thailand.

<https://github.com/KashouMMT/pattaya-japan>
- 2025-11-26 ~ Present
- LLM Chatbot System

Developed an AI-powered chatbot system using LLM integration and RAG, featuring contextual memory, vector-based retrieval, and a customizable full-stack architecture.
